National Senior Certificate

- High school education from Jan. 2009 to Dec. 2013
- 87% average final mark

Personal Profile

I have 3+ years of experience in Digital Product Development from 3 different startups (Seed & Development, Startup and Growth business stages respectively). I served in roles of Technical Product Manager, Full Stack Engineer, Front-End Engineer, UI & UX (Figma & Miro) and Cloud Engineer with Agile Scrum and Kanban product development frameworks.

I have done some studies in BCom Informatics and BSc Computer Science, both incomplete degrees, and discovered through practical work experience, on real products, that I truly excel in the Product Engineer role.

I combine skills gained in the multiple key roles of a product team, and strive to create value through leading and serving on teams that are dedicated to creating life-changing products that have a positive impact.
